CHAPTER I.

EXPLANATION OF THE SYSTEM OF REGISTRATION.

THE system under which the trade of the province of Bengal is registered has been described in previous reports. And no change was introduced into it during the year 1882-83.

Registration of rail-borne traffic.

2. The system of registering rail-borne traffic has, however, been recently revised under the orders of the Government of India, with effect from the commencement of the current official year, and it has now been assimilated to that prevailing in the rest of India. Arrangements have also been made to publish in future the statistics of trade for each quarter separately, as well as in the annual report on the internal trade of Bengal. The results of the registration of this trade during the quarter ending the 30th June 1883 have already been published by this Government.

Registration of steamer traffic.

3. The statistics of trade carried by inland steamers have, as before, been obtained from the records of the India General Steam Navigation Company and the Rivers Steam Navigation Company, and the acknowledgments of the Lieutenant-Governor are again due to the Agents of these Companies for the courtesy with which they have always placed their books at the disposal of Government. Arrangements have recently been made with the Chief Commissioner of Assam, by which the returns of the boat and steamer traffic between Bengal and Assam, which is carried along the Megna and Brahmaputra, will be incorporated in the quarterly reports mentioned above, from the beginning of the year 1884-85.

Calculation of weights.

4. In order to arrive at the net weight of the articles carried by the East Indian Railway, the compiling office at Jamalpore has, since 1880-81, been making the necessary deductions in the traffic returns of this railway on account of packing weights in accordance with an empirical scale fixed for that purpose. This system of calculating weights has now been adopted by the Eastern Bengal Railway, as well as in the preparation of the returns of traffic carried by inland steamers. Instructions were also issued in September 1883 to the Examiner of Accounts of State Railways in Bengal to follow this method of calculation in the preparation of the trade returns furnished to Government. In the case of country boat and road traffic, the chief staples registered in Bengal may be divided into three classes, as follows:—

Class I.—Those articles in the case of which the weight only is given;

Class II.—Animals, and articles of which the number alone is registered;

Class III.—All articles of which, primarily, the value and, where possible, the weight are registered.

Net weights are invariably shown for staples coming into class I, and so far as can be ascertained, for those coming within class III also. It is therefore not necessary to make any deductions from the declared weights in these branches of the provincial traffic.

Classification of commodities.

5. The Government of India have recently prescribed a revised classification list of commodities for adoption in registering rail-borne traffic. The new classification has already been introduced in Bengal, and the statements of traffic since April 1883 are being prepared in accordance with it.

Valuation of articles.

6. The system of calculating the values of all articles of traffic was the same as in previous years, but the Government of India have now directed that the valuations shall be revised every three months instead of every six months. Instructions have accordingly been issued to the local officers of selected districts to ascertain and submit to Government the statement showing the average wholesale prices at the expiration of each quarter.

CHAPTER II.

2. It will be observed that the total weight of goods carried during the past year was 16·13 per cent less than in the preceding year. The Nuddea station alone shows an increase, the quantity registered being 5,12,059 maunds in excess of the figures of 1881-82, and 7,49,356 maunds over those of 1880-81. The figures of the Jungipore and Kissengunge stations show a decrease of 14,52,711 maunds and 10,66,734 maunds respectively, as compared with the trade of the previous year. This was due to the unfavourable state of the Bhagiruthee and Matabhanga rivers for traffic. The Collector of Tolls, Bhagiruthee river, writes:—

"The traffic only commenced in the middle of July 1882, a month later than usual, and only continued in the usual quantities till the middle of September, when the navigation became dangerous from the formation of clay banks. The heavy traffic only came down during two months last year, instead of four, as in ordinary years. Hence the falling off."

The Toll Collector of Kissengunge states that the Matabhanga river was virtually unnavigable for laden boats from the early part of November. The station at Kissengunge was transferred to Hanskhali in that month, a branch office being retained at the former place. The chief staples in the down-stream traffic which showed an increase were raw jute, gunny-cloth, pulses, manufactured silk goods, stone and marble, refined sugar, unrefined sugar, and tobacco; while wheat, miscellaneous spring crops, rice, saltpetre, other saline substances, linseed, mustard seed, other oilseeds, and timber, showed a decrease. As regards the up-stream traffic, the largest increase was in gunny-bags, paddy, and iron; and the articles showing the largest decrease were European cotton piece-goods, gunny-cloth, and salt.

3. The number of laden boats registered during the past year was 28,639, against 32,933 in 1881-82, and 35,345 in 1880-81, as shown below:—

* Piece-goods, mats, and manufactures of silk are shown according to value in rupees.

The Calcutta portion of the trade will be discussed elsewhere in this report. A brief account is given here of all the intermediate traffic upon this route.

5. *Jute, raw.*—The registered jute trade amounted to 15,00,946 maunds, against 13,19,445 maunds in 1881-82, and 9,47,031 maunds in 1880-81. The importation into Calcutta amounted to 11,48,786 maunds, and the despatches to other places were 3,52,160 maunds, of which 3,47,876 maunds were registered for Bhuddressur. The principal places supplying the Bhuddressur market were, Doolalgunge (3,44,619 maunds), and Kissengunge (1,070 maunds). Notwithstanding the increase in the quantity of jute carried, the registered value was less than in the previous year in consequence of the low prices prevailing in the Calcutta market.

6. *Gunny-bags and cloth.*—No hand-made gunny-bags were registered during the year under review, but the total quantity of gunny-cloth was 2,896,530 pieces, which at the rate of two pieces per bag would give 1,448,265 bags against 2,047,507 bags registered in 1881-82, and 1,977,745 bags in 1880-81. The destination of the traffic was mainly Calcutta, which received 1,113,650 bags. The remainder (334,615 bags) was distributed as follows:—Bhuddressur in Hooghly (291,865 bags), Rughoonathpore in Moorshedabad (18,400 bags), Jungypore (12,300 bags), and Joyrampore in Moorshedabad (11,000 bags), besides small quantities consigned to Moorshedabad and Burdwan. The Bhuddressur imports were obtained from the mart of Doolalgunge in Purneah. Rughoonathpore and Jungypore drew their supplies from Maldah, and Joyrampore from Basdebpore in the Moorshedabad district.

7. *Wheat.*—There was a large decrease under this head, the total quantity registered being 9,38,203 maunds, against 13,27,462 maunds in 1881-82, and 19,88,078 maunds in 1880-81. The supply brought down to Calcutta was 9,15,984 maunds, and of the remaining 22,219 maunds, Hooghly received

17,433 maunds, Moorshedabad 2,047 maunds, Nuddea 1,473 maunds, and other places 1,266 maunds. The great bulk of the wheat imported into Bengal is carried by rail, and it is to be noticed in this connection that the imports carried by the East Indian Railway during 1882-83 were a long way behind those of the previous year, though they are still far in advance of those of 1880-81.

8. *Gram and pulse.*—Under this head an increase is shown of 81,005 maunds as compared with 1881-82, and of 13,474 maunds as compared with 1880-81. Out of the total supply during the past year, Calcutta imported 7,20,397 maunds. The remainder, which amounted to 59,887 maunds, was delivered in small quantities at the different marts in Hooghly (32,432 maunds), Burdwan (13,181 maunds), Moorshedabad (7,705 maunds), Nuddea (6,131 maunds), and the 24-Pergunnahs (438 maunds).

9. *Other spring crops.*—The total trade in miscellaneous spring crops showed a decrease of 99,956 maunds as compared with 1881-82, and of 19,914 maunds as compared with 1880-81. This trade for all practical purposes was with Calcutta only.

10. *Rice and paddy.*—The total trade amounted to 7,50,160 maunds, against 12,54,763 maunds in 1881-82, and 12,97,179 maunds in 1880-81, as shown below:—

After excluding the figures of the Calcutta trade, amounting to 6,00,842 maunds of rice and 582 maunds of paddy, during the past year, there remain 1,42,444 maunds of rice and 10,416 maunds of paddy, the distribution of which is shown in the following statement:—

The decrease was due entirely to the increased difficulties of navigation and not to any falling off in the up-country rice crop, which was, on the contrary, unusually abundant.

11. *Hides.*—Under this head a decrease is shown of 3,262 pieces as compared with 1881-82, and of 6,465 pieces as compared with 1880-81. The trade during the past three years was entirely with Calcutta.

12. *Saltpetre.*—The weight of saltpetre registered was 11,666 maunds against 18,180 maunds in 1881-82, and 21,004 maunds in 1880-81, the whole of which was sent to Calcutta.

13. *Other saline substances.*—There was a decrease of 44,512 maunds in the quantities registered during the past year, as compared with 1881-82, but an increase of 16,327 maunds is shown when compared with 1880-81. The quantity sent to Calcutta during the past year was 1,04,649 maunds, while the

remaining 890 maunds were consigned in small quantities to marts in the Moorshedabad, Nuddea, 24-Pergunnahs, and Burdwan districts.

14. *Linseed.*—The linseed trade fell off from 18,55,483 maunds in 1880-81 to 12,85,346 maunds in 1881-82, and 9,43,246 maunds in 1882-83. The quantity imported into Calcutta during the past year amounted to 9,19,646 maunds, and the despatches to other places aggregated 23,600 maunds, of which 21,751 maunds were consigned to Bhuddressur.

15. *Mustard-seed.*—The total quantity of mustard-seed was 5,31,382 maunds, against 8,95,305 maunds in 1881-82, and 10,96,050 maunds in 1880-81. The quantity brought down to Calcutta was 4,99,358 maunds, and the distribution of the remaining 32,024 maunds is shown in the following statement:—

17. *Silk, raw.*—The silk trade was limited to 1,244 maunds, against 1,554 maunds in 1881-82, and 818 maunds in 1880-81. The supply sent to Calcutta was 203 maunds, and to marts in the Moorshedabad district 1,033 maunds.

18. *Manufactures of silk.*—The total value of manufactured silk goods registered was Rs. 23,550, against Rs. 15,750 in 1881-82, and Rs. 19,000 in 1880-81. This is entirely local traffic between Shibgunge in Maldah, and Khagra and Baloochur in the Moorshedabad district.

19. *Stone and marble.*—There was a large increase under this head, the total quantity registered being 3,89,017 maunds, against 2,11,059 maunds in 1881-82, and 3,75,398 maunds in 1880-81. This trade, for all practical purposes, was only with Calcutta.

20. *Sugar, refined.*—The total quantity registered was 96,754 maunds, showing a large increase of 76,303 maunds compared with 1881-82, and of 71,096 maunds compared with 1880-81. Almost the whole of this was sent to Calcutta.

21. *Sugar, unrefined.*—There has been a satisfactory revival in this trade, the total quantity registered being 52,135 maunds, against 37,574 maunds in 1881-82, and 42,936 maunds in 1880-81. The supply despatched for metropolitan consumption amounted to 27,825 maunds, while 24,310 maunds found their way to marts in Hooghly, Burdwan, Moorshedabad, Nuddea, and the 24-Pergunnahs.

22. *Tobacco.*—The total of the tobacco trade was 1,88,926 maunds, against 1,54,928 maunds in 1881-82, and 1,60,449 maunds in 1880-81. Of this supply, 55,926 maunds went direct to Calcutta, and the remainder, 1,33,000 maunds, was distributed as follows:—

These figures indicate an increase under gunny-bags and a decrease under gunny-cloth, as compared with the preceding year. The supplies exported from Calcutta were 256,375 bags and 190,475 pieces of gunny-cloth. The exports of gunny-cloth from other districts comprise 14,725 pieces sent from Moorshedabad, and 600 pieces from Burdwan. The destinations of these exports were as follows:—

It will be seen that the gross weight of goods conveyed during the past year was 14·69 per cent in excess of the previous year's figures. In the downward traffic the increase amounted to 23·57 per cent and in the upward traffic to 6·60 per cent. The Midnapore canal was closed to allow of the clearance of the silt for a period of three weeks in January and February. Regarding the Hidgellee canal, which was closed from the 15th January 1883, the Executive Engineer, Balasore Division, writes:—

"The canal was closed for silt clearing on the 15th January 1883, the Kallynuggur end having become so bad as to be impassable during neap-tides, even for the lightest boats; if the canal had been in good order, and open to traffic for the whole year, the tolls, instead of a falling off of nearly Rs. 2,000, would doubtless have shown a substantial increase, as notwithstanding the silted state of the Kallynuggur end, the receipts from June to December were Rs. 11,375 in excess of those for the corresponding months of the previous year."

34. A large portion of the increase in the past year's traffic is due to the development of the rice trade. The other staples which showed an increase over the trade of the previous year are piece goods, gunnies, pulses, brass and copper, oils, tobacco, and timber; while coal, paddy, mats, miscellaneous oilseeds, and stone showed a decrease. The number of laden boats registered during the past three years was as follows:—

36. Last year the share of Calcutta was 56·64 per cent of the import trade, but only 27·40 per cent of the export trade. Compared with 1881-82, the figures of the Midnapore district show an advance of 51,170 maunds under imports and of 4,32,273 maunds under exports. The trade of Hooghly also shows an increase, namely 71,722 maunds under imports and 34,176 maunds under exports. The chief articles of commerce carried along these routes during the past three years are shown in the following statement:—

The large increase in the traffic in rice and cotton piece-goods, both native and European, is especially noticeable.

The two final columns of the foregoing statement show the proportion of the Calcutta traffic to the total trade. This section of the traffic is

separately dealt with in this report. The following is a brief description of all the important items of local traffic upon this route.

TRAFFIC ON THE ORISSA CANALS.

The traffic upon this route during the past year shows an increase of 46·04 per cent when compared with 1881-82, and of 46·90 per cent when compared with 1880-81. The following statement is taken from the report of the Executive Engineer, Brahmini-Byturni Division :—

"There has been a decided improvement in the trade of the district, as clearly shown by the increase in the tollage receipts from the canals in this division, as compared with the last year. The figures are :—

	Rs.
For 1881-82	49,155
" 1882-83	62,852
Difference ...	13,697

which is equivalent to a rate of Rs. 27-8 per cent in the year. The export trade in rice having revived to some extent, accounts for this enhancement in the revenue receipts.

"The branch canal from the end of high level canal range III to Bhuddruck was opened in January of this year, when the Government steamer and passenger-boats began to ply. It is too soon, however, to express an opinion as to the success of the line, but the traffic in passengers has certainly increased in the three months since the service commenced. There has been a small trade in pulses, exported from Cuttack to Bhuddruck, but very little movement of rice from the tracts traversed by the high level canal to Cuttack for export.

"The direct route for the trade of this country with Calcutta and Chandbally will be the connecting canal between Bhuddruck and the Metai, and the Jajepore canal from Aquapadda on the right bank of the Byturni."

44. The total number of laden boats, the cargoes of which were registered during the past three years, is :—

47. *Rice and paddy.*—The total increase in the rice trade amounted to 3,45,081 maunds as compared with 1881-82, and to 4,03,354 maunds as compared with 1880-81. The importing marts and the places of supply in connection with this trade for the past three years are shown in the following statements:—

TRAFFIC ON THE CALCUTTA CANALS.

48. The total quantity and value of the traffic passing along the Calcutta canals, exclusive of the merchandise which was loaded and unloaded at the Port Commissioners' wharves, were as follows:—

	Quantity of goods registered by weight.			Value of all articles of trade.		
	1880-81.	1881-82.	1882-83.	1880-81.	1881-82.	1882-83.

The increase in the gross quantity registered during the past year was 7·15 per cent as compared with 1881-82, and 22·05 per cent as compared with 1880-81; but the money value of the trade evinced a decrease of 7·57 and 4·82 per cent as compared with 1881-82 and 1880-81, respectively.

49. The improvement was mainly in the import trade, the most important items which contributed to the increase in the year's traffic as compared with 1881-82 being raw jute (9,41,934 maunds), lime (2,05,451 maunds), betel-nut (1,06,480 maunds), firewood (53,157 maunds), linseed (34,335 maunds), and unrefined sugar (34,191 maunds). In the export trade, there was very little difference between the quantities carried during the past year and in 1881-82; but the total value shows a considerable decrease of Rs. 62,75,535, owing partly to a reduction in the price of salt, the exports of which declined in value by Rs. 24,49,884, and partly to a falling off in the trade in European twist and yarn (Rs. 13,96,265), European piece-goods (Rs. 11,13,808), metals (Rs. 3,67,528), and oils (Rs. 5,12,994). Detailed statements of this trade will be found amongst the appendices attached to this report.

52. *Caoutchouc or India-rubber.*—This is mainly an article of down traffic, and the quantity so carried during the past year was 9,004 maunds. The supply despatched to Calcutta was 7,962 maunds, while only 1,012 maunds were sent to Goalundo, and 30 maunds to Naraingunge. The chief places supplying the Goalundo market were Goalpara (384 maunds), Kamroop (352 maunds), Durrung (152 maunds), Nowgong (102 maunds), and Lukhimpore (22 maunds). The Naraingunge supply was imported from Chuttack.

53. *Gram and pulse.*—The total quantity carried upwards to Assam was 1,29,714 maunds. After deduction of the supply consigned from Calcutta, there remained 20,456 maunds, out of which 13,291 maunds were sent from Serajgunge, 2,412 maunds from Goalundo, 785 maunds from Naraingunge, and 72 maunds from Dacca.

54. *Rice.*—The total quantity of rice sent to Assam was 4,04,920 maunds, of which Goalundo supplied 2,24,655 maunds, Serajgunge 1,48,642 maunds, Nulchitty 1,740 maunds, and Kalligunge 1,052 maunds.

TRAFFIC ALONG THE BRAHMAPUTRA AND MEGNA RIVERS CARRIED BY THE STEAMERS OF THE EASTERN BENGAL RAILWAY.

55. THE year under review is the third year of the registration of the trade carried by the steamers of the Eastern Bengal Railway Company along the Brahmaputra and Megna rivers. The result of the transactions for 1880-81 and 1881-82 was published in the reports for those years, and the statistics now furnished relate to the trade registered during the past official year.

56. The total amount of this trade registered during 1882-83, as compared with the figures of the two previous years, was as follows:—

It will be seen that the gross weight of goods conveyed during the past year was 3·18 per cent greater than in the previous year, and 23·38 per cent in excess of the total of 1880-81, the increase being entirely in the downward traffic. The money value of the trade, however, showed a decrease of Rs. 49,28,954 and Rs. 39,58,313 as compared with the years 1881-82 and 1880-81, respectively. Of the 310 lakhs of rupees worth of goods carried by these services, as much as 100 lakhs consisted of piece-goods. The next most valuable commodity was raw jute, which was valued at nearly 79 lakhs of rupees, hides estimated at 39½ lakhs of rupees, and Indian tea valued at 37¾ lakhs of rupees. Next to these in value came salt, the trade in which was valued at 10 lakhs; then gunnies valued at 8 lakhs, raw cotton at 5½ lakhs, European twist and yarn at 4½ lakhs, and brass and copper and their manufactures at 4 lakhs. Of the entire traffic, 99 per cent was carried to, and from, Calcutta.

57. *Dacca Service.*—There was a large accession to the traffic of the Dacca service, the gross quantity carried showing an increase of 17·60 and 29·88 per cent. on the figures of the two years 1881-82 and 1880-81, respectively. Almost the whole of this traffic was through traffic with Calcutta, and the only items of the downward trade in which the intermediate or local traffic was of any importance are raw jute (78,760 maunds), tobacco (1,200 maunds), and hides (49,000 pieces)

58. *Serajgunge Service.*—The returns of the weight of goods carried by this service showed a decrease of 10·56 per cent. in the down traffic, and of 15·77 per cent. in the up traffic, as compared with the previous year's trade. STATEMENTS OF BENGAL RAILWAY TRAFFIC.

60. Since October 1877, the traffic on the East Indian Railway carried downwards and upwards to and from Bengal has been registered under the block system of registration, the details of which have already been explained in previous reports, while the statistics of trade carried along the Eastern Bengal line have, since January 1878, been confined to the registration of the import and export trade of Calcutta alone. Under orders received from the Government of India in the Department of Revenue and Agriculture, arrangements have recently been made by the Government of Bengal, with effect from the commencement of the current official year, to register the rail-borne traffic in Bengal carried along the East Indian and the Eastern Bengal Railways and connected lines in accordance with the system in force in other parts of India. The result of the re-organized plan of registration will in future be published separately at the close of each quarter, as well as in the annual reports on the internal trade of Bengal. The statistics of trade carried along these lines during the quarter ending the 30th June 1883 have already been published for the information of the mercantile community.

TRAFFIC ALONG THE EAST INDIAN RAILWAY.

61. As in 1881-82, the compilation of the statistics of trade carried along the East Indian Railway was effected under five different trade blocks, which are mentioned in column I of the tabular statement given below. The total weight and value of the import and export trade of each of those blocks during the past year, as compared with the figures of the two previous years, are shown in the following statement :—

These figures show an expansion of traffic in quantity as well as in value. The import trade rose from 3,46,40,301 maunds in 1880-81 to 4,36,95,168 maunds in 1881-82, and 4,71,98,968 maunds in 1882-83, while in the export trade there was a similar advance in the past year, as compared with the preceding two years, the figures being 3,83,88,614 maunds in 1880-81, 4,59,58,135 maunds in 1881-82, and 4,67,40,272 maunds in 1882-83. The increase in the Calcutta block was 8·36 per cent as compared with 1881-82, and 28·69 per cent as compared with 1880-81. In Western Bengal the increase amounted to 6·68 and 32·17 per cent on the returns of the two years 1881-82 and 1880-81 respectively, while the trade of the Behar block showed a falling off of 4·3 per cent. as compared with 1881-82, and an increase of 23·61 per cent. as compared with 1880-81.

62. The net amount of traffic carried downwards and upwards during the past three years is shown in the subjoined statement:—

115. Of the traffic from Nalhati to Azimgunge, the largest increase, as compared with 1881-82, occurred in coal (19,804 maunds), European piece-goods (Rs. 51,600 in value), gunnies (14,595 bags), metals (1,278 maunds), and salt (5,199 maunds); while in the traffic moving in the opposite direction from Azimgunge, the principal items showing an increase are gram and pulse (30,895 maunds) and hides (11,976 pieces).

TIRHOOT STATE RAILWAY.

116. The total quantity and value of the traffic conveyed by the Tirhoot State Railway during the past three years, exclusive of Railway materials, were :—

	Downward traffic.	Upward traffic.	Total.	
	Quantity.	Quantity.	Quantity.	Value.
	Mds.	Mds.	Mds.	Rs.
1880-81	10,65,204	10,19,589	20,74,793	2,76,59,846

1882-83	14,00,810	18,84,906	32,85,716	3,81,45,816

It will be seen that the downward traffic during the past year was 22·49 per cent over the figures for 1881-82, and 32·75 per cent over those of 1880-81, while in the upward traffic there was an advance of 49·78 per cent on the returns of 1881-82, and of 84·87 per cent on those of 1880-81.

117. In the down trade the figures under indigo, pulses, hides and skins, ghee, saltpetre, and linseed show a marked increase; while in the up trade the most noticeable items showing an advance over the previous year's figures are coal, European piece-goods, gunnies, rice, gram and pulse, iron, salt, and indigo-seed. The following statement shows the quantity and value of the principal staples carried during the past three years :—

118. *Coal.*—The upward coal traffic of the past year shows a very large increase, amounting to 1,95,441 maunds as compared with 1881-82, and to 1,64,824 maunds as compared with 1880-81.

119. *Cotton piece-goods.*—The traffic in European piece-goods shows a great improvement. The total value of the different sorts of piece-goods carried upwards during the year was Rs. 1,00,82,700, being in excess of the trade of 1881-82 by Rs. 21,57,075, and greater than that of 1880-81 by Rs. 47,43,750. This increase may be fairly attributed to the gradual rise of the railway in public favour, as being the safest mode of transit for high class goods of this description. In the case of Indian piece-goods, there was a decrease in the past year's returns of 38·42 and 84·15 per cent as compared with the figures of 1881-82 and 1880-81 respectively.

120. *Indigo.*—The total quantity of indigo carried down this line during the past year was 52,255 maunds, being 7,841 maunds in excess of the quantity shown in the previous year's returns, and 14,862 maunds greater than the trade of 1880-81. The increase is mainly attributable to the outturn of the year's crop being better than in the previous years.

121. *Food-grains.*—The different staples returned under this head are shown below, the trade in each of them being compared with that in each of the preceding two years:—

	1880-81.	1881-82.	1882-83.
	Mds.	Mds.	Mds.
Wheat	46,891	53,701	17,830
Pulses and gram	1,50,505	1,29,788	2,40,759
Rice	2,41,586	2,02,096	2,17,930
Paddy	3,260	1,485	12,043
Total ...	4,42,242	3,87,070	4,89,162

It will be seen that there has been a great recovery in the trade. The total quantity of food-grains sent to Calcutta from Mozufferpore and Durbhunga was 70,302 maunds during the past year, of which 46,765 maunds were carried by rail and 23,537 maunds by country boats.

122. *Hides.*—The down traffic in hides shows an increase of 157,384 pieces as compared with 1881-82, and of 42,424 pieces as compared with 1880-81. The imports into Calcutta from Mozufferpore and Durbhunga were 485,808 pieces, all by rail.

123. *Liquors.*—The value of the liquor trade going upwards during the past year was Rs. 3,64,284, against Rs. 3,69,306 in 1881-82, and Rs. 3,27,510 in 1880-81.

124. *Iron and its manufactures.*—The figures for the past year show an increase of 24,312 maunds as compared with 1881-82, and of 39,753 maunds as compared with 1880-81.

125. *Ghee.*—There was a large increase in this traffic, the quantity carried downwards being 25,107 maunds against 12,835 maunds in 1881-82, and 2,088 maunds in 1880-81.

126. *Salt.*—There was a very satisfactory increase in the salt traffic, the total quantity carried upwards being 4,99,659 maunds, against 3,58,619 maunds in 1881-82, and 2,73,447 maunds in 1880-81. The quantity sent to the Mozufferpore and Durbhunga districts from Calcutta was as follows:—

	By railway.	By river.	Total.
	Mds.	Mds.	Mds.
1880-81	2,62,343	1,29,862	3,92,205
1881-82	3,49,782	89,317	4,39,099
1882-83	3,97,296	87,443	4,84,739

127. *Saltpetre.*—The downward traffic amounted during the past year to 1,45,031 maunds against 1,00,764 maunds in 1881-82, and 1,08,109 maunds in 1880-81. The quantity of saltpetre carried to Calcutta from Mozufferpore and Durbhunga was 1,53,328 maunds, of which 1,47,520 maunds were sent by rail, and 5,808 maunds by river.

128. *Oil-seeds.*—There was a considerable increase in the quantities of oil-seeds carried by the railway, the figures being:—

	1880-81.	1881-82.	1882-83.
	Mds.	Mds.	Mds
Linseed	2,26,431	2,37,979	4,92,673
Mustard seed	40,297	28,719	19,691
Other oil-seeds	417	504	10,067
Total ...	2,67,145	2,67,202	5,22,431

The increase was partly due to the favourable state of the Calcutta market, and partly to the reduction in the rates of freight charged on these seeds, which induced merchants to avail themselves of the railway. The supply sent to Calcutta from the Mozufferpore and Durbhunga districts during the past three years was as follows:—

	By rail.	By river.	Total.
	Mds.	Mds.	Mds.
Linseed—			
1880-81	2,06,552	4,61,154	6,67,706
1881-82	1,96,898	3,12,436	5,09,334
1882-83	4,60,973	69,762	5,30,735

1881-82	19,019	32,725	51,744
1882-83	23,497	39,519	63,016

129. *Indigo-seed.*—This trade is steadily increasing. The quantity carried upwards during the year was 1,67,314 maunds, against 69,888 maunds in 1881-82, and 49,983 maunds in 1880-81.

130. *Tobacco.*—The figures of the downward traffic for the past year show a decrease of 14,285 maunds as compared with 1881-82, but an increase of 70,810 maunds as compared with 1880-81. The amount of tobacco sent to Calcutta from the two districts of Mozufferpore and Durbhunga during the year was 3,496 maunds, of which 3,414 maunds were consigned by rail and 82 maunds by river.

GYA STATE RAILWAY.

131. In January 1883 the Gya State Railway was transferred to the East Indian Railway. The returns of the trade carried by this line from April to December 1882 were furnished by the Examiner of Accounts of State Railways, and those from January to March 1883 by the Agent of the East Indian Railway.

132. The total traffic attracted to this line during the past three years, exclusive of Railway materials, was as follows:—

Year.	Towards Gya. Quantity.	From Gya. Quantity.	Total. Quantity.	Total. Value.
	Mds.	Mds.	Mds.	Rs.
1880-81	5,27,927	7,69,956	12,97,883	1,86,95,892

1882-83	5,81,421	10,84,680	16,66,101	2,61,77,427

133. The advance in the aggregate quantity of goods conveyed by this line was 1,35,635 maunds, or 8·86 per cent, as compared with 1881-82, and 3,68,218 maunds, or 28·37 per cent, as compared with 1880-81. The most important items of traffic carried by this route during the past three years are shown in the following statement:—

COTTON, RAW.

2. The trade of Calcutta in raw cotton during the past three years is shown in the following statement:—

3. The total decrease in the imports amounted to 16·33 per cent on the figures for 1881-82, and 25·52 per cent on those for 1880-81. Raw cotton is for the most part brought to Calcutta by the East Indian Railway, and the returns of that line show a decline of 25·91 and 38·33 per cent from the totals of the two years 1881-82 and 1880-81 respectively. The crop of the past season was not so good as in the previous year; but the principal cause of the decrease is the diversion of the traffic from Calcutta to Bombay. The Collector of Customs, Calcutta, writes:—

Imports.

"It is evident that the lower steam freights from Bombay are seriously injuring the trade in cotton *viâ* Calcutta, and the advantages possessed by the former are of such

importance that ultimately nearly all the cotton which used to be shipped to Europe *viâ* Calcutta, may come to be exported from Bombay. I am informed that cotton shipped, for example, to Trieste *viâ* Bombay, notwithstanding the higher railway carriage from some producing districts can be laid down cheaper by 2½ per cent than if it were shipped from Calcutta. This difference in favour of Bombay is so great that it is hardly to be expected cotton will be shipped from Calcutta if it continues."

The following table gives an abstract of the imports, province by province, during the past three years:—

Exports.

5. There was a decrease in the export trade, amounting to 2,58,280 maunds, as compared with 1881-82, and 5,12,810 maunds as compared with 1880-81. The distribution of the sea-borne trade was as follows:—

European twist and yarn.

8. The total quantity of foreign twist and yarn cleared for consumption from shipboard and from bond during the past year was 9·14 and 18·45 per cent below the figures for the years 1881-82 and 1880-81 respectively. The different ports which contributed to the trade during the past three years are shown in the following statement:—

9. The Collector of Customs, Calcutta, writes:—

"The falling off in the imports of all kinds of yarn—grey, white, and coloured—is eight per cent. In the lower counts of yarn from 32s downwards there has been an increase, especially in 25s to 32s, but the total importations in the lower counts of these yarns are not large compared with the receipts from Bombay. The principal decline is in 40s mule twist, which is the count imported in the largest quantity—in fact the receipts of this count are almost double those of all the other counts together. In coloured yarns there has also been a decline. The Turkey-red yarn imported is now to a large extent prepared from alizarine and not from madder, the former being considerably cheaper, while the colour differs very slightly. The alizarine used for this purpose is obtained from coal tar. Stocks of grey yarn have not, however, increased during the year, as on the 31st December 1881 they were 3,042 bales, while at the end of last year they stood at 2,124 bales. The principal increases were in yarns that have been free from duty for some years."

Indian twist and yarn.

10. The imports of Indian twist and yarn show a decrease of 21,515 maunds as compared with 1881-82, but an increase of 20,773 maunds as compared with 1880-81. The boat traffic, which comprises for the most part the produce of the cotton mills in the vicinity of Calcutta, shows a decrease of 34·5 per cent as compared with

1881-82. The following statement shows the supplying districts and their marts during the past two years:—

European twist and yarn—Exports.

11. The total quantity of twist and yarn of European manufacture exported from Calcutta during the past year was 5·40 per cent below the trade of 1881-82, and 9·33 per cent below that of 1880-81. The falling off in the internal trade was 11·26 per cent as compared with 1881-82, and in the sea-borne trade 11·80 per cent. The distribution of the export trade during the past three years was as follows:—

The piece-goods carried by rail and by inland steamers are registered by weight only, and the values are calculated at Rs. 75 per maund, being the average price in Bengal of piece-goods of all sorts. In all other cases the figures represent declared values.

20. The figures given against the imports by sea represent the total clearances of foreign piece-goods from shipboard and from bond for consumption. Last year the total value of these goods showed a decrease of 2·14 per cent as compared with 1881-82, and of 14·13 per cent as compared with 1880-81. The sources of the supply during the past three years were as follows:—

21. The Collector of Customs, Calcutta, offers the following remarks on the condition of the foreign trade in piece-goods during the past official year:—

"In Lancashire, the trade in cotton piece-goods has not been flourishing. There was a small crop of American cotton, estimated at 5¼ millions of bales, which caused prices of this description to be at one period comparatively high, and had it not been for the large supplies of Indian cotton sent forward, values would probably have advanced considerably, when manufacturers would have been placed at a further disadvantage by the combination of high prices for the raw material, with low prices for the manufactured article in the principal consuming markets. As it is, the manufacturers have had a most unsatisfactory year, and it has been with the utmost difficulty that they have managed to get prices that would cover cost, while in many instances serious losses must have been suffered. In the districts of Lancashire, specially engaged in the production of goods for the Indian market, the demand throughout the year for the principal articles, such as shirtings, has been poor and sluggish, and it has been a matter of considerable difficulty to dispose of the whole production. In the Blackburn district, where large quantities of goods for India are produced, many looms were stopped. The high prices of 1880-81 must have been a source of weakness to dealers; as large contracts were made at that time at prices above those ruling in the following years, so that caution had to be exercised, and orders restricted, with a view to getting rid of these high priced goods, and even so, the rates obtained for them must have involved losses, as they were brought into competition with the lower priced ones ordered subsequently. To the merchants engaged in it, though on certain special kinds of goods money has been made, the trade generally during the past year has been disappointing. The fluctuations in value have been very slight, but the smallness of the margin between the cost of the goods laid down in India and the selling prices has often not been sufficient to cover more than actual cost to the shipper, and in some cases there must have been actual loss. Low prices consequent on the want of elasticity in the demand, and keen competition among the different houses concerned account for this; to the competition is also due that the whole of the 5 per cent import duty remitted has gone, as it should have done, to the benefit of the consumers."

Exports.

22. The total decrease in the export trade was ·78 per cent as compared with 1881-82, and 1·63 per cent as compared with 1880-81. Looking to the different routes followed by the trade, it will be seen that by far the largest portion was exported by rail. The decrease in the quantity carried by the East Indian Railway amounted to ·08 per cent on the returns of 1881-82, and to 4·97 per cent on those of 1880-81. The Eastern Bengal Railway showed a falling off of 5·22 per cent as compared with 1881-82, and of 1·69 per cent as compared with 1880-81, while in the supply exported *viâ* the Northern Bengal State Railway there was a decrease of 1·76 per cent as compared with 1881-82, and an increase of 8·56 per cent as compared with 1880-81. The traffic carried by inland steamers advanced 20·96 per cent as compared with 1881-82, and 61·23 per cent as compared with 1880-81. The boat traffic showed a decrease of 20·51 per cent on the figures for 1881-82, but an increase of 36·88 per cent on those for 1880-81. The exports by road routes showed a decrease of 9·54 per cent on the totals of 1881-82, but an increase of 3·03 per cent on those of 1880-81, while in the sea-borne exports there was an increase of 1·28 per cent as compared with 1881-82, and a decrease of 16·50 per cent as compared with 1880-81. The following statement shows in detail the different places to which piece-goods were exported from Calcutta during the past three years:—

Comparison of imports with exports.

23. After the addition of 25 per cent to the total clearances from ship-board and from bond on account of under statement of values, duty, insurance, landing charges, &c., &c., the total of the year's traffic would be raised to Rs. 14,07,38,006, out of which Rs. 13,89,35,066 worth of goods were exported during the year as shown above. The excess of imports over exports amounted, therefore, to Rs. 18,02,940 against Rs. 36,14,394 in the previous year.

38. There are altogether seven cotton mills in Bengal, namely three in Howrah and four in the 24-Pergunnahs district, but in none of them were piece-goods manufactured during the year under review. Concerning the manufacture of cotton cloth by hand, the information furnished by some of the Divisional Commissioners in their annual administration reports for the year 1882-83 is extracted below—

Progress of local manufacture by steam and by hand.

Burdwan Division.—"Cotton cloth is manufactured in several parts of the division. The *dhootees* and *sarees* of Gopipore, Mirtolla, and Lalbagan in Culna, are remarkable for their fine texture. It is reported that a weaver of Lalbagan obtained a certificate of honour for a pair of *dhootees* exhibited by him in the late Calcutta Exhibition. This industry is, however, on the wane owing to the large importation of English piece-goods. The weavers at one time were very numerous, but their number has of late considerably decreased. The Assistant Magistrate of Raneegunge reports that during his last cold-weather tour he did not come across one single weaving-machine such as he had seen in the Hooghly district."

Presidency Division.—"Santipore cloths are being ousted from the market by cheaper imported piece-goods."

Rajshahye and Cooch Behar Division.—"Cotton cloth is manufactured to a small extent for local use in Dinagepore, Bogra, Rungpore, Julpigoree, and Darjeeling. It is made of good quality in considerable quantities in Pubna, and is largely exported from that district. A weaver of Dogachee is said to have obtained, during the year, a bronze medal for some samples sent to the Calcutta Exhibition. The weavers of this district are said to be thriving, as there is a demand for the country-made cloth."

Dacca Division.—"Country cloth has been almost entirely superseded by Bombay and European piece-goods. Many weavers have of late years given up their trade and gone in for agriculture. * * * * . Of country cloth, there is one kind, however, called *jamdani*, which is still manufactured in considerable quantities, and much used by native ladies and gentlemen. The *jamdani* and the other finer fabrics manufactured in and about the town of Dacca, and at Bazitpore in Mymensing, are still in great request among the higher and wealthier classes of the people of this country."

40. It will be seen that the increase last year in the import trade was 3·74 per cent as compared with 1881-82, and 6·67 per cent as compared with 1880-81. The outturn of the year's crop was 11·94 per cent greater than that of the previous year, and was generally of a fair average quality. The price realized was, however, low, averaging according to the returns of the Custom-house, only Rs. 223 per maund against Rs. 252 in 1881-82, and Rs. 241 in 1880-81. In the following statement the imports of indigo into Calcutta are classified according to the provinces from which it is received:—

44. It will be seen that the imports of raw jute during the past year were as much as 22·87 per cent over those for 1881-82, and 58·89 per cent over those for 1880-81. Compared with 1881-82, the advance was most marked in the quantities carried by the Eastern Bengal Railway (21·06 per cent), and by boat (23·51 per cent). The imports by road, however, showed a falling off of 23·45 per cent; but in the traffic carried by inland steamers there was an increase of 23·85 per cent. The crop of the past season was an abundant one, and the area under cultivation was greater than in the previous year. The Commissioner of the Dacca Division writes:—

Imports.

"Owing to this largely increased cultivation, there was somewhat of a glut in the market, which combined with the somewhat inferior quality of the fibre produced during the year, caused a falling off in prices. In Dacca, prices fell from Rs. 3 and upwards to Rs. 2-2 and Rs. 2-8, and in Furreedpore from Rs. 2-4 to Rs. 1-8, and eventually to 12 annas per maund. In Dacca, a large quantity had to be kept in stock unsold on the chance of better prices being hereafter obtained. The Collector of Mymensingh does not state the extent of the falling off in the prices in his district, but there can be no doubt that the market was much affected by the excess of the supply over the demand

"The Collector of Mymensingh writes:—'The growers of jute have not done so well during the year under review as in preceding years, on account of there being a glut in the market, but I believe it is now looking up. The jute cultivators have been generally considered to be the most prosperous class among the rural population in this district, but they suffered considerably last year from the falling off in the price, caused by the turning out of an unprecedentedly large crop of jute, and the supply being consequently in excess of the demand of the trader.'

"From what I hear, and have observed, I am led to believe that a very much smaller area will be brought under cultivation during the present year. The cultivators have been disgusted by the low prices prevailing, and say, it is better to grow rice, which pays nearly as well, and does not give half the trouble that jute does, with its steeping, peeling, drying, and many other processes before the fibre is fit for the market."

45. Regarding the outturn of the jute crop in Northern Bengal, the Commissioner remarks:—

"Jute turned out a bumper crop in Dinagepore, Bogra, Rungpore, and Julpigoree, and a good harvest in Rajshahye and Pubna, but a poor one in the Terai. Much, however, of the jute in Dinagepore was lost for want of water for steeping. The cultivation of jute was extended in Rajshahye. It is reported from Pubna that its cultivation was very extensive—probably greater than in any former year, the ryots having been induced to sow it largely by the high prices realized for the fibre during the two previous years. It is said that probably the rice produced in the sub-division of Serajgunge was insufficient for the consumption of the people on account of the large area under jute; but this was immaterial, as rice is always imported there from the districts of Bogra and Dinagepore.

"The price of jute fell everywhere owing to abundance of supply, with the result, it is said, that the ryots obtained little profit from the abundant harvest. At the same time the crop was so large that it is difficult to believe that the general result was unsatisfactory to the cultivators."

46. The following statement shows all the principal districts which contributed largely to the trade, arranged in the order of the quantities imported into Calcutta:—

The quantity sent to Calcutta by the Eastern Bengal Railway was 68·11 per cent in excess of the imports by the same route during the preceding year, but the number brought by river and road routes showed, respectively, a decrease of 18·42 and 26·62 per cent over the figures of 1881-82. The increase in the imports by sea was 76·21 per cent. Out of the total traffic carried by the Eastern Bengal Line, as much as 9,104,413 bags were consigned *viâ* the Northern Bengal Railway, against 4,263,610 bags in 1881-82, and 1,269,072 bags in 1880-81.

If a machine-made piece be taken as equal to 80 yards, and a hand-made piece as equal to 22 yards, the total of the year's traffic amounted to 2,113,206 yards against 3,361,019 yards in 1881-82, and 1,654,624 yards in 1880-81.

64. The export trade by internal routes shows a falling off of 88·57 per cent as compared with 1881-82, and of 97·48 per cent as compared with 1880-81. The sea-borne exports, however, show an increase of 190·82 and 60·08 per cent on the figures

66. According to measurement, the gross total of the year's traffic under exports amounted to 26,700,249 yards. After deducting from this 854,590 yards imported from the interior, and allowing 2,000,000 yards for the Calcutta consumption, the result shows the outturn of manufacture in Calcutta to be 27,845,659 yards, which is equal to 3,48,071 maunds at about 80 yards to a maund, against 45,444,122 yards, or 5,68,052 maunds, in 1881-82, and 85,994,531 yards, or 10,74,932 maunds, in 1880-81.

FOOD-GRAINS.

67. The harvests of the year under report not being so abundant as those of the preceding two years, there was a rise in the prices of all sorts of food-grains. The outturn of the crops in the Patna Division was indifferent, but the Commissioner explains that this did not affect the material condition of the people. He writes:—

"Generally speaking, although the harvest during the year was deficient, little decrease in comfort was the result, owing to the succession of good years which had preceded it. The surplus of previous years had, in short, the effect which might have been expected."

68. The Commissioner of the Bhagulpore Division states that the price of food was generally higher owing to deficiency in the outturn of the crops. This deficiency, however, did not cause serious evils, as the comparatively high prices at which food-grains were sold compensated for the smaller yield of the crops.

69. As regards the Rajshahye and Cooch Behar Division, the Commissioner writes:—

"The year under review was not one of agricultural prosperity. There was scanty rainfall in Dinagepore, Rajshahye, Pubna, and Bogra; and though the fall of rain was not scanty in the remaining three districts, yet the results were not so favourable on the whole as could be wished.

"Owing to indifferent harvests the prices of rice in Dinagepore, Rajshahye, Pubna, and Bogra were higher than those of the preceding year."

70. In the Dacca Division the rice market was easy in all the districts, and the crop was, on the whole, a good one. The Commissioner remarks:—

"In Dacca the various rice crops were generally good average ones. In Furreedpore the *boro* (or spring rice) and the *ous* (or autumn rice) crops were good ones, but not so the *amun* or winter rice. The latter is stated to have been not more than a ten-anna crop. In Backergunge the seasonable distribution of the rainfall resulted in good crops of rice, though not bumper ones as in the previous year. In Mymensing the rice crops may be said to have been fairly average ones, the abundance of the earlier crops (*ous*) making up for the deficiency in the *amun* or winter crop."

71. Similarly, the Commissioner of the Chittagong Division reports that "throughout the division the prices of rice were low. In Noakholly and Tipperah there was a glut in the market."

72. The rice crop in the Orissa Division was exceptionally good, but the tendency to a fall in price was counterbalanced by increased exports of the article from all the three districts.

73. In the Burdwan Division the harvest was not a very full one, but the stocks of the preceding year served to keep the market low.

74. Regarding the Presidency Division the Commissioner remarks that in none of the districts were the crops so abundant as in the preceding year, but the outturn of paddy was, on the whole, an average one.

75. The total quantity of food-grains imported into, and exported from, Calcutta during the year shewed a decrease of 9·72 per cent. compared with 1881-82, and an increase of 14·25 per cent. compared with 1880-81. As compared with the average prices ruling in the three previous years, the reduction in the price of wheat was 7·44 per cent, of barley 10·14 per cent., of best rice 19·84 per cent., of common rice 23·03 per cent., of maize or Indian-corn 17·53 per cent., and of gram 18·34 per cent. In the case of lesser millets, however, the average price was 3·06 per cent. dearer than that ruling in the preceding three years. The districts in which the price of common rice was lowest were—

It will be seen that there was a considerable falling off in the wheat trade of Calcutta during the past year as compared with 1881-82, but when compared with 1880-81 the aggregate increase in the import trade was 2·67 per cent, while in the export trade the advance was 10·35 per cent. The Collector of Customs, Calcutta, writes :—

"The unusual exports of 1881-82 were stimulated by a deficient American harvest and the action of speculators there who kept back supplies, but these causes having ceased to operate, the trade for the year (1882-83) may be considered a normal one. That it has kept up so well in spite of increased competition is most satisfactory, and may fairly be taken as an index of the future prosperity of the trade."

80. The import trade shows a decrease of 34,78,188 maunds in the quantities registered during the past year as compared with 1881-82, but an increase of 1,89,883 maunds when compared with 1880-81. The quantity attracted to the East Indian line was 25·94 per cent less than in 1881-82, but 61·23 per cent greater than the total of 1880-81. The boat traffic showed a very large decrease of 55·39 and 68·41 per cent as compared with the two years 1881-82 and 1880-81. The sources of the supply, province by province, were—

The Collector of Customs, Calcutta, writes:—

"The chief market for the wheat grown in India is the United Kingdom, where it has to compete principally with the wheat of the country, and that from the United States, Canada, Russia, Germany, Australia, and Chili. The harvest in the United Kingdom was the best for many years, though not a bumper one, while in all the other supplying countries crops were good, especially in the United States. The result has been a year of low prices, the average price in December 1882 being 41*s.* 6*d.* per quarter, against 44*s.* 4*d.* in December 1881."

87. The excess of imports over exports amounted to 11,81,572 maunds, against 16,23,524 maunds in 1881-82, and 15,66,138 maunds in 1880-81.

Quantity not exported before the close of the year.

the supplies carried by the East Indian Railway. The quantity thus brought to the Calcutta market was no less than 16,88,993 maunds during the past year against 13,63,722 maunds in 1881-82, and 10,04,104 maunds in 1880-81. The quantity carried by country boats was 1,55,555 maunds more than in 1881-82, and 1,84,424 maunds in excess of the totals of 1880-81. The road traffic figures, however, show a falling off of 67·39 and 47·51 per cent as compared with the figures of the previous two years. The Collector of Customs, Calcutta, writes:—

"There was an increase in the shipments to the United Kingdom, Reunion, South America, China, France, Australia, Italy, Zanzibar, and Egypt, against a decrease to the Cape of Good Hope, Mauritius, the West Indies, Aden, Arabia, Ceylon, the Maldives, the Straits Settlements, and Natal. There have also been shipments to Mozambique, St. Helena, and other countries in Africa against none in the previous years.

"To the United Kingdom, the exports have advanced by 55½ per cent and are far beyond the figures shown for any previous year. The imports into the United Kingdom do not, however, appear to have increased during 1882, so that the increase from India, as Burmah also exported largely, must have been counterbalanced by a decrease from other countries."

Stocks of rice in Calcutta.

Paddy is not included in the foregoing statement. The total imports of paddy during the past year being 18,90,873 maunds and the total exports 4,83,773 maunds, there remained a balance of 14,07,100 maunds, which, at the rate of 25 seers to a maund of paddy, is equivalent to 8,79,438 maunds of rice. If this figure were added to the stocks of rice shown above, the total would be raised to 34,93,527 maunds against 31,01,774 maunds in 1881-82, and 27,58,392 maunds in 1880-81.

MISCELLANEOUS SPRING AND RAIN CROPS.

103. The principal staples classed under this head are barley, *kodo*, *shama*, Indian-corn, oats, and millets, which are reaped during the spring and rainy seasons. The total of the Calcutta trade in these grains during the past three years was as follows:—

This reduction in the duty has brought about a material decrease in the retail price of salt throughout the province. The following statement has been prepared from the published prices-current, from which it will be seen that in most districts

the average prices of 1882-83 are more than a rupee per maund below the average prices of 1881-82:—

There was a satisfactory increase in this trade during the past year as compared with the previous two years. The Commissioner of the Patna Division observes that the considerable increase in the refinery licenses in the Mozufferpore district during the year indicates prosperity in the trade, while in Sarun the year was decidedly a favourable one to manufacturers who must have realized large profits.

Imports.

133. The total increase in imports was 80,724 maunds as compared with 1881-82, and 85,382 maunds as compared with 1880-81. The advance in the quantities carried by the East Indian Railway was 18·26 and 18·09 per cent as compared with the preceding two years respectively, while the quantity attracted to the river was 62·56 per cent less than the figures for 1881-82, and 53·82 per cent below those for 1880-81. The entire supply during the past three years was derived from the provinces mentioned below:—

The Collector of Customs, Calcutta, writes :—

" These large shipments to the United Kingdom in conjunction with large exports from Bombay had the effect of causing prices in London to be the lowest known for many years. At the commencement of 1882 the spot price was 48s per quarter, but the heavy supplies that were continually arriving caused values gradually to recede, until at the close of the year the price was only 41s 6d. per quarter, showing a slight recovery from the lowest point which was reached in November and December The complications in Egypt and higher freights checked to a trifling extent the downward tendency of the market, but when it was seen that communications *via* the Suez Canal would not be seriously interfered with, prices continued to fall until they reached the level indicated "

Comparison between exports and imports

143. The exports exceeded the imports by 1,00,845 maunds in 1882-83. In 1881-82 the surplus of imports over exports amounted to 4,21,145 maunds against 1,46,462 maunds in 1880-81.

MUSTARD-SEED.

144. The total quantity of mustard-seed imported into and exported from Calcutta during the past three years was as follows :—

Imports.

145. It will be seen that the imports during the past year were as much as 41·90 per cent over the figures for 1881-82, and 84·76 per cent over those for 1880-81. The supply carried by the East Indian Railway, which amounted to 82·60 per cent of the total trade, was 12,33,829 maunds more than in 1881-82, and 25,18,919 maunds more than in 1880-81. The imports by country boats were 1,17,858 maunds in excess of the corresponding trade in 1881-82, and 1,79,827 maunds less than that of 1880-81. The steamer figures show a large decrease of 1,91,566 maunds and 1,93,020 maunds, as compared with the totals of the preceding two years. 151. There was a satisfactory recovery in the import trade during the past year, the total quantity being 25,421 maunds against 20,874 maunds in 1881-82, and 23,140 maunds in 1880-81. The Commissioner of the Burdwan division, however, remarks that the silk trade in Midnapore is everywhere declining, except perhaps at Ghattal, owing to the importation of Chinese silk. Mulberry silk manufacture is on the decline in Bankoorah. In Beerbhoom, the industry is reported to be not thriving at present, though mulberry cultivation is said to be very remunerative to the cultivators. As regards Moorshedabad, the Commissioner remarks that silk, as before, need only be mentioned in order to report the old tale, that it is fast declining.

Imports.

152. The largest despatches made by the stations on the line of rail were, from Damookdia, 6,502 maunds; Azimgunge, 3,975 maunds; and Moorarooe, 3,498 maunds.

The Collector of Customs, Calcutta, writes:—

"There has been an advance in the exports of raw silk of 24¾ per cent, and the figures are about on a level with the averages of the previous five years. This most satisfactory increase is attributable to a large supply of cocoons, and also probably to the report that the Italian crop of silk would be short, and the Chinese only an average one. It is to such circumstances that we must now look for any considerable increase in this trade, for there can be little doubt that the competition of other silks in the European markets is too strong for the Bengal article. The carelessness of the native reeler and the inferiority of the cocoon will always heavily handicap Bengal silk. The consumption of silk depends greatly upon the fashion in dress, which during last year was very fluctuating, though it is said the tendency is still to return to goods made entirely of silk."

155. The surplus of imports over exports amounts to 2,874 maunds against 1,977 maunds in 1881-82. In 1880-81 there was a deficit of imports compared with exports of 2,032 maunds.

157. The total quantity of refined sugar imported by all routes was 13·12 per cent in excess of the trade of 1881-82, and 56·47 per cent above that of 1880-81. Under unrefined sugar there was a slight decrease of 2·91 per cent as compared with 1881-82, but an increase of 3·59 per cent when compared with 1880-81. In the figures of boat traffic there was an increase of 22·56 per cent under refined, and of 4·54 per cent under unrefined sugar, as compared with the previous year; while the rail-borne traffic showed an advance of 86·8 and 17·39 per cent under refined and unrefined sugar respectively. The following statement shows the imports of sugar, classified according to the provinces from which it was imported:—

158. The manufacture of date sugar continues to thrive in the Nuddea district. Regarding Jessore, the Commissioner writes:—

"The most important manufacture in Jessore is that of goor, or unrefined date sugar. Twenty-four thousand one hundred and twenty-two acres of land are under date cultivation, and 832 acres under sugarcane. The outturn of coarse sugar was 10,056 tons, and its average price was Rs. 3-6 per cwt. The total value of sugar, refined, fine, and coarse, manufactured during the past year, was Rs. 27,72,599 for sugar (chinee) and Rs. 20,73,642 for coarse sugar (goor)."

159. The Commissioner of the Rajshahye and Cooch Behar division gives the following account of the sugar industry in Northern Bengal:—

"Molasses are largely manufactured in Dinagepore, Rajshahye, Bogra, and Rungpore; but in Dinagepore the manufacture is not equal to the demand, as there are large imports from Ghazipore. Strange to say, however, some is nevertheless exported. The manufacture in Rajshahye is for home consumption. According to Mr. Larymore's estimate, 3,00,000 maunds of raw sugar were manufactured in this district. A considerable quantity from Bogra, i.e., about half of what is made in Rungpore, is exported. The extent of manufacture in Pubna, Julpigoree, and Darjeeling Terai is small. In Pubna and Darjeeling Terai it is for local use only, and a small quantity is exported from Julpigoree.

"Another product of the sugarcane, known as *math*, is manufactured in Julpigoree to the exent of some 5,000 maunds per annum, and locally consumed."

160. The condition of the sugar manufacture in Shahabad and Durbhunga is thus described by the Commissioner of the Patna division:—

Shahabad.—"The only manufacture of this district, as distinguished from the handicrafts * * * is that of sugar. Messrs. Burrows and Thomson and Mylne, who are greatly interested in the subject, estimate the area under sugarcane cultivation at 36,000 acres, and the outturn of goor at 14,40,000 maunds.

"Mr. Peterson, the Sub-divisional Officer, Buxar, writes:—'The yield has not been as successful as in the preceding year, and the fall of price in the Bombay market caused considerable losses amongst traders and buyers in the local market. In some cases I am given to understand that speculators were prepared to sacrifice their advances, in consideration of the cancelments of their contracts and engagements, to prevent the possibility of heavier losses. Enquiries in connection with the license tax also brought to my notice the depressed condition of the trade, and the general complaint as to the decrease in profits. The centre of the manufactory district is Doomraon, where the largest refineries are at work, with small manufactories in the adjoining villages. The supply of fuel is also another difficulty in connection with the development of the industry. Wood is procured locally, as importation for purposes of fuel is out of the question; and it remains to be seen whether the extension of manufacture will have any effect in reducing the quantity of land now devoted to orchards and plantations.'

"Mr. Faulder, the Sub-divisional Officer of Madhubani, states that sugar is one of the most flourishing manufactures in this sub-division. There are 30 refineries, of which 16 are at Madhubani, and five at Rampatti; the others are scattered about the sub-division. The number has not varied since last year. About 5,000 bigahs of land are under sugarcane, and the outturn was about 30,000 maunds of sugar, worth Rs. 2,10,000; and 12,000 maunds of *goor* and 60,000 maunds of *chhooa*. Of this, about seven-eighths were exported. The price this year averaged Rs. 7 a maund, which was a rise of 12 annas upon that of last year. The owners of the sugar godowns are not natives of Madhubani, but of Ghazipore and the South Gangetic districts, who have established themselves here on account of the cheapness of sugarcane and fuel. They advance money on the crop to the cultivators, and are thus the chief mahajuns of the place, as well as sugar-manufacturers. The year has been a prosperous one, on the whole, for them, and the manufacture appears to be well established here."

161. In the Bhagulpore division the industry is said to be in its infancy, but is thriving under the impetus given it by the extended use of Mylne's "Beheea" mills, some hundreds of which are in use.

164. If 2½ maunds of unrefined sugar be taken as equal to one maund of refined, the total of the year's traffic amounted to 22,61,876 maunds of unrefined sugar under imports and 13,09,057 maunds under exports. The total quantity not exported before the close of the year under review, therefore, amounted to 9,52,819 maunds, against 10,58,135 maunds in 1881-82, and 7,76,000 maunds in 1880-81.

Quantity not exported before the close of the year.

There was a considerable increase, during the past year, in the quantities carried to and from Calcutta; but, unfortunately, the outturn of the season's crop was of low quality, the average price, according to the customs return, being only ten annas three pie per pound against twelve annas in 1881-82 and ten annas six pies in 1880-81. The Collector of Customs, Calcutta, writes on the subject as follows:—

"The principal cause of this unfortunate state of affairs was the extremely poor quality of the crop generally, Darjeeling, Cachar, and Sylhet, the Dooars, and Assam having all failed to produce tea of as good a quality as in the previous year. This may be in part owing to the system of coarse plucking, but probably climatic influences have had most to do with it."

166. The Commissioner of the Rajshahye and Cooch Behar Division writes:—

"Prices have been bad throughout the year. Colonel Morton observes 'there was no want of leaf, but the market did not appreciate it. Experts differed in opinion, some said the season was at fault, others that something was wrong in the manufacture. Probably both causes, joined to an overstocked market, led to depreciated prices.' It is said that several gardens worked at a dead loss.

"Mr. Waco believes that the good prices of the season of 1881 tempted agents and managers to go in for a large outturn. The season was all in favour of such a policy, flushes being very rapid. The result was coarse leaf. The supply met in the home market a very large import of cheap China tea and large stocks in hand. The result was naturally a heavy fall in prices, which were 30 to 50 per cent below those of 1881. Shipments to America were very unsuccessful, and the Australian market got more than it wanted, with the result of a fall in price."

167. Chittagong tea is said to have acquired a good name for its quality. The outturn of tea in Hazaribagh and Lohardugga during the past year was

larger than that of the previous year, but the average price realized showed a falling off of about two or three annas per pound.

Imports.

168. As regards the imports, the figures show a large increase of 19·87 per cent as compared with 1881-82, and of 20·02 per cent as compared with 1880-81. The largest imports were, as usual, conveyed by inland steamers, but the quantities carried by rail also showed an increase of 8·76 per cent as compared with 1881-82. The imports by sea also indicate an advance on the figures of the preceding two years. The following comparative statement shows the imports from the several provinces during the past three years:—

There was a satisfactory increase in this trade during the past year. The following statement is made in the report of the Collector of Customs, Calcutta:—

"There was a good demand throughout the greater portion of the year for local consumption which interfered in a measure with the export trade; but that, notwithstanding this, the crop was sufficiently good to raise the figures of the quantity available for export above those of the previous year to the extent it did, must be taken as satisfactory."

176. The sub-divisions of Bongong and Ranaghat in the Nuddea district are said to have produced a very plentiful crop of tobacco. In Rungpore, there was a 12-anna crop. Tobacco, in the hands of Messrs. Begg, Dunlop & Co. at Poosah, in the Tajpore sub-division of the Durbhunga district, bids

fair to hold a place among the chief manufacturing products of the Patna division, but as yet the manufacture, though promising, can scarcely be said to have passed beyond the experimental stage. In addition to the manufactory at Poosah, the cultivation of tobacco is very extensively carried on throughout the sub-division. As regards Mozufferpore, the Collector writes :—

"The principal exports of the above are from the Hajeepore sub-division, where the plant is largely cultivated, but the sub-divisional officer reports that the exports fell off considerably during the past year owing to the decreased demand, as well as to the fact that the crop of 1882-83 was not of a very good quality, and consequently prices were low. A great deal of tobacco was stored in the hope of prices rising, but these hopes have not yet been realized, and the whole trade has been much depressed."

177. The import trade shows an advance of 5·78 per cent on the figures for 1881-82, and of 7·91 per cent on those for 1880-81. The quantity carried by the Eastern Bengal Railway showed a large increase of 29·22 per cent as compared with the previous year, but in the road traffic there was a heavy falling off, amounting to 60,556 maunds, or 31·82 per cent. The total supply brought to Calcutta from each province is shown in the following statement :—

181. There was an increase in the exports of 3·86 per cent as compared with 1881-82, but as compared with 1880-81 the figures show a decrease of 12·45 per cent. The details of the sea-borne trade are shown in the following statement :—

Quantity not exported before the close of the year.

INLAND TRADE OF CHITTAGONG.

183. The total inland trade of Chittagong carried by country boats during the past three years was as follows:—

	1880-81.	1881-82.	1882-83.
	Mds.	Mds.	Mds.
Imports	18,17,805	23,71,680	28,08,852
Exports	3,76,389	3,43,298	4,56,542
Total ..	21,94,191	27,14,978	32,65,394

It will be seen that the gross weight of goods carried during 1882-83 was 20·27 per cent. in excess of the trade of the preceding year, and 48·82 per cent. over that of 1880-81. The import trade shows a steady development, the figures for the past year being 18·43 and 54·52 per cent. greater than those of the previous two years, 1881-82 and 1880-81, respectively. Under exports there was an increase of 33 per cent. as compared with 1881-82, and of 21·30 per cent. as compared with 1880-81. The chief staples which showed a marked increase are rice, raw cotton, European piece-goods, hides, oils, sugar, and timber.

184. The total value of merchandise carried by country boats during the past three years is shown below, as compared with the sea-borne trade of the port during the same years:—

		Imports.	Exports.	Total
		Rs.	Rs.	Rs.
Inland trade	1880-81	40,19,769	13,10,071	53,53,810

	1882-83	1,12,96,793	1,23,63,197	2,36,60,290

As compared with 1881-82, the total increase in the inland trade was 23·50 per cent., while the figures of the sea-borne trade showed an advance of 20·21 per cent.

185. *Caoutchouc.*—There was a large falling off in the trade in caoutchouc, the total exports from Chittagong by coasting vessels amounting in value to Rs. 8,430 against Rs. 27,439 in 1881-82, and Rs. 73,260 in 1880-81. The decrease during the past year is attributed to the high prices ruling for this article in the interior of the Chittagong district.

186. *Cotton, raw.*—The total quantity of raw cotton exported from Chittagong during the past three years was:—

The amount of raw cotton exported by country-boats during the year showed an advance of 3,470 maunds over the figures of the preceding year, but in the coasting trade there was a decrease of 18,307 maunds, owing principally to a dull market at Naraingunge. The following statement exhibits the total quantity of raw cotton carried to Naraingunge from this port during the past three years:—

	By country boats.	By sea-going vessels.	Total.

187. *Cotton twist and yarn, European.*—The total value of the import trade by coasting vessels, under this head, was Rs. 2,18,971 against Rs. 2,34,143 in 1881-82, and Rs. 1,81,931 in 1880-81, the falling off being probably due to the large stocks in the previous years.

188. *Cotton piece-goods, European.*—The total value of these goods imported into Chittagong by sea-going vessels amounted to Rs. 16,64,060, against Rs. 16,30,365 in 1881-82, and Rs. 17,81,466 in 1880-81. The exports of piece-goodsby country boats to the interior of the Chittagong district, during the past year, were valued at Rs. 2,95,573 against Rs. 1,82,589 in 1881-82, and Rs. 1,75,989 in 1880-81.

189. *Jute, raw.*—The jute trade has largely expanded, the quantity imported into Chittagong in 1882-83 showing an advance of 84·04 and 136·53 per cent over the figures of the previous two years, 1881-82 and 1880-81, respectively, as shown below:—

The quantity of raw jute shipped for England from this port during the past year was as much as 87·34 per cent in excess of the figures of the preceding year, and 162·39 per cent over those of 1880-81. The Collector of Customs, Chittagong, writes:—"This trade continues to make very marked and rapid progress; and it is satisfactory to note that still further expansion and development may be expected next year"

190. *Gunny-bags.*—The gunny-bags imported by coasting vessels from Calcutta during the year were valued at Rs. 1,75,463 against Rs. 2,61,792 in 1881-82, and Rs. 1,59,704 in 1880-81. Most of the vessels from Chittagong, both European and native owned, having cleared this season for home ports with grain stored in bulk, a large number of gunny-bags remained in hand

191. *Rice and paddy.*—The total quantities of rice and paddy imported into Chittagong by country boats during the past year are shown below, and compared with the figures of the previous two years:—

There was an increase of 30 per cent. in the imports of rice and compared with those of 1881-82, and of 77·74 per cent. as compared with those of 1880-81. The following statement shows the principal places in Bengal from which Chittagong imported rice and paddy during the past year:—

192. *Hides and skins.*—The total value of hides and skins carried from Chittagong by coasting boats amounted to Rs. 2,35,734, against Rs. 2,08,889 in 1881-82, and Rs. 1,59,356 in 1880-81.

193. *Oils.*—According to the coast trade returns, the total value of oils imported into Chittagong was Rs. 1,20,121, against Rs. 1,64,078 in 1881-82, and Rs. 1,64,990 in 1880-81. The boat traffic returns of the inland trade show an importation of 11,614 maunds of oils, against 6,956 maunds in 1881-82, and 2,317 maunds in 1880-81. Of the total importation, 8,013 maunds were shipped from Calcutta.

194. *Salt.*—The total quantity of salt imported into Chittagong by sea was 2,83,302 maunds, against 3,76,380 maunds in 1881-82, and 3,45,711 maunds in 1880-81. The decrease last year, amounting to 93,078 maunds, is stated by the Collector to be due to the smaller importation of salt from the United Kingdom, on account of there being a large surplus stock in hand at the commencement of the year under report. The total exports by country boats amounted to 2,18,064 maunds, against 2,05,880 maunds in 1881-82, and 2,02,687 maunds in 1880-81, and were distributed thus :—

In addition to the above, the quantity of salt shipped for Naraingunge by sea-going vessels was 1,71,278 maunds, against 1,24,153 maunds in 1881-82, and 19,727 maunds in 1880-81.

195. *Sugar, refined and unrefined.*—The total quantity of refined and unrefined sugar imported into Chittagong by country boats was as follows:—

	Mds	Mds	Mds
Refined . .	3,801	937	3,863

As compared with 1881-82, the increase under refined sugar was 312·27 per cent., and under unrefined sugar 69·47 per cent. The increase under the latter head was due to large imports of molasses from Keshubpore in Jessore. The quantity of sugar and sugarcandy imported by coasting vessels was valued at Rs. 89,516, against Rs. 79,876 in 1881-82, and Rs. 1,06,316 in 1880-81.

196. *Tea, Indian.*—The total quantity of Indian tea exported from Chittagong by coasting vessels was 1,029,973 lbs., against 809,424 lbs. in 1881-82, and 736,817 lbs in 1880-81. The quantity of tea sent direct to the United Kingdom amounted to 954 lbs., against 975 lbs. in 1881-82, and 265 lbs. in 1880-81.

197. *Tobacco.*—The import trade along the coast was valued at Rs. 70,913 against Rs. 1,23,705 in 1881-82, and Rs 1,06,096 in 1880-81. The total quantity of tobacco sent to Chittagong from Naraingunge during the past three years was as follows:—

199. It will be seen that the increase in the gross value of the trade noticed last year was maintained, and still further extended during the year 1882-83. Excluding the years 1877-78 to 1879-80, which formed an exceptional period, owing to the high demand caused by the Madras and Bombay famines, the total trade during the year was the largest in the past decade.

200. The trade of Balasore showed an increase of 2·94 per cent. under imports, and a decrease of 7·91 per cent under exports, as compared with the figures of 1881-82. The steady increase in the imports to Chandbally from the

other ports in the Balasore district is partly due to the superiority of the former port in the estimation of the native merchants of Cuttack, and partly to the increased importation of Government stores for use in connection with the Coast Canal. The decrease in the export trade was mainly in hides and oilseeds. This is attributed by the Collector to the dullness of the Calcutta market.

201. The large decrease of 79·46 per cent in the import trade of Cuttack was merely due to the diversion of the trade to the Chandbally route. The increase of 48·47 per cent in the exports was chiefly due to the brisk trade in rice, which was largely exported to home as well as foreign ports, owing to the low price that ruled in the Orissa markets throughout the year.

202. As regards Pooree, the figures showed an advance of 510·06 per cent under imports, and of 331·08 per cent under exports. The largest increase in the import trade occurred in gunny bags. Concerning the export trade the Collector remarks:—

"The highest figure (225,664 cwt.) was reached in 1876-77, when the severe famine of Madras caused an unprecedented demand. Since then there was a steady falling off till the year under report, when suddenly more than four times the quantity of the year before was exported. In the last year's report the causes of depression were fully gone into. As for the causes of this sudden increase, we have to look to the bumper harvests of the last two years, which left an abundant stock available for export; but the main stimulus to the trade was given by the appearance of two new exporters, *viz.*, Hazi Abdool Latif, who started business in December last, and exported largely to Madras, and a Deccan trader, who also sent rice to Madras in *dhoonies* chartered by him. In normal years there is always a large surplus available for export; and what is wanted is enterprise to send it away. Had the two men I referred to not been in the field, the exports of rice would probably have been as poor as in the year before."

203. The following statement shows the direction of the trade of the Orissa ports during the past three years:—

Mr. Chapman, Customs Officer of Chandbally, remarks:—

"The trade in mule twist, No 40 (English), has slightly fallen off. Owing to the small demand for the finer twist, there has been a large increase in country twist of Nos. 10, 12, 14, 16, and 20. These numbers being coarser in texture and cheaper, have a good market, as they are in great demand for weaving of country cloth, which is rapidly increasing, and is worked by hand-loom."

207. *Cotton piece-goods.*—The trade in European cotton piece-goods showed a decrease of Rs. 1,30,268 in value as compared with 1881-82, and of Rs. 4,46,031 as compared with 1880-81. The total value of Indian piece-goods was Rs. 13,209 against Rs 2,871 in 1881-82, and Rs. 16,299 in 1880-81. The value of piece goods sent to Balasore was Rs. 9,36,671 against Rs. 9,78,761 in 1881-82, and Rs. 8,22,773 in 1880-81. The main portion of these imports is taken into the Cuttack district, and only a small supply passes towards Bhuddruck and to the Northern Gurjat State. A little is disposed of locally by petty traders

208. *Gunny-bags.*—This trade rose from 510,076 bags in 1880-81 to 718,694 bags in 1881-82, and 1,492,879 bags in 1882-83.

209. *Metals.*—The total weight of metals was 27,743 maunds against 24.338 maunds in 1881-82, and 33,777 maunds in 1880-81.

218. *Timber and sleepers.*—The total exports under this head fell off from 1,092,360 cwt. in 1880-81 to 43-564 cwt. in 1881-82, and 28,148 cwt. in 1882-83. Orissa sâl sleepers are said to fetch a lower price than formerly on account of their being inferior in quality.

219. *Silver, private.*—The value of specie exported otherwise than by Government was Rs. 9,97,109 against Rs. 12,57,739 in 1881-82, and Rs. 16,98,097 in 1880-81. The decrease in the Balasore ports amounted to Rs. 2,60,630 as compared with the preceding year. The Collector states that the reasons given in the last report* account fully for the gradual decrease in the import and export of private specie.
